

WAVETRAP

WAVETRAP Privacy Box.

The Ultimate **Enclosure** for Confidential Meetings

The Privacy Box is a compact transparent enclosure offering a high-level of electromagnetic and acoustic protection, ensuring the confidentiality of your meetings.

In an era of growing threats from eavesdropping and the interception of compromising emissions, decision-makers require a reliable and visually appealing solution to safeguard against mobile phone tracking, voice recording, and other forms of interception, such as IEMI*, during their meetings.

*Intentional Electro-Magnetic Interference.

Privacy at your grasp

Compact

Experience of the technology

Protect what matters.

The Privacy Box is a sleek metallic and glass container designed to securely hold one or more mobile devices.

Its **transparent glass lid** allows users to keep on eye on their devices while providing robust protection against unwanted tracking and eavesdropping.

For optimal effectiveness, the Privacy Box can be paired with an **ultrasonic jammer** to block any audio recording. While the Privacy Box itself requires no power to operate, the ultrasonic jammer is battery-powered for seamless functionality.

The Privacy Box is lightweight, **compact**, and comes with a convenient transport case, making it easy to move and set up wherever needed.

Characteristics :

- ✓ Selective EM shielding solution
 - ✓ High performance shielded gasket
 - ✓ Ultra-sonic jamming
 - ✓ EM Transparent Glass cover
 - ✓ Optimized low power jamming
-
- Weight : 8.2kg
 - Size : 340X340X100mm
 - Compatible jammer list : USJ-09
 - Prototype & test: Optimized and test based on IEEE299
 - Operating temperature & Storage : from 5 to 40°C degrees , in a dry environment

Options : Customer logo / Multi-packs or customized size version / Transport case - 500 x 400 x 260 mm, 6 kg
